

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1-5. (canceled).

6. (currently amended): A subpixel forming a pixel of a color display screen, comprising:

one display portion; and

a plurality of thin film transistors for driving the display portion,

wherein the plurality of thin film transistors are arranged such that their channels are positioned in parallel to each another.

7. (previously presented): The subpixel according to Claim 6, wherein provided that a length of one side of the subpixel is 1, a channel width of at least one of the plurality of thin film transistors is 0.4 or more.

8. (previously presented): The subpixel according to Claim 6, wherein the thin film transistors are organic thin film transistors or amorphous Si thin film transistors.

9. (previously presented): The subpixel according to Claim 7, wherein the thin film transistors are organic thin film transistors or amorphous Si thin film transistors.

10. (previously presented): The subpixel according to Claim 6, wherein the display portion is an organic electroluminescence(EL) element.

11. (previously presented): The subpixel according to Claim 7, wherein the display portion is an organic electroluminescence(EL) element.

12. (previously presented): The subpixel according to Claim 6, wherein the channels of the plurality of thin film transistors are subjected to a rubbing process.

13. (previously presented): The subpixel according to Claim 7, wherein the channels of the plurality of thin film transistors are subjected to a rubbing process.
